---

Junior in Computer Science at the University of Utah, looking for employment as a Software Engineer Intern to gain knowledge and expertise.

## EDUCATION

---

**BS, Computer Science** | *University of Utah*  
GPA 3.7 / 4.0 | Dean's List for 2 semesters

[anticipated] May 2023

**Full Stack JavaScript Web Development Bootcamp** (Certificate) | *V School*

July 2020

## SKILLS

---

Java • C# • Node.js • MongoDB • Express.js • Mongoose • Git/GitHub  
Javascript • HTML • CSS • React.js • AJAX/HTTP • Styled Components

## RELEVANT EXPERIENCE

---

**Contract Web Developer** | *Marin County Young Democrats*  
San Rafael, CA | [www.marincountyyoungdemocrats.com](http://www.marincountyyoungdemocrats.com)

June – August 2020

- Contracted to update website on Wix's website builder.
- Improved styling, layout, navigation bar; added rich text input for blog posts; implemented timeline with hover feature.
- Oversaw client communication and project scope, worked directly to client to brainstorm/review updates and preferences.

## PROJECTS

---

**Blogtopia** | [blogtopia.herokuapp.com](http://blogtopia.herokuapp.com)

July 2020

- Designed and programmed full-stack blog editing app as a final project at V School.
- Implemented user interface to create/edit a blog, make blog posts, and upload images.
- Utilized the Unsplash API for (non-uploaded) images, TinyMCE for the rich text editor (for blog posts), Styled Components, and modals.
- Built with: React, CSS, Node.js, MongoDB, Mongoose, Express.js, and AWS S3 to store images.

**Photo Sharing** | [photograph-share.herokuapp.com](http://photograph-share.herokuapp.com)

May 2020

- Collaborated with group using git/GitHub to program full-stack photo sharing social media app.
- Implemented user interface to post images, like/comment on images, and explore other profiles.
- Built with: React, CSS, Node.js, MongoDB, Mongoose, Express.js, and Firebase storage for images.

**BookMark** | [bookmark-books.surge.sh](http://bookmark-books.surge.sh)

March 2020

- Designed and programmed my first big project: a book search app.
- Implemented user interface to find books, get info on individual books, and save to separate lists.
- Built with: React, CSS, Axios for API calls and responses, and the Google Books API.
